

Allowed Reference Material

Required References

- CPT® (AMA Standard or Professional edition ONLY)
- Your choice of ICD-9-CM (expert editions are allowed)
- Your choice of HCPCS Level II (expert editions are allowed)

Note: Any officially published corrections or errata belonging to these three references are also permitted. AAPC's study guides, CPT® Assistant or other CPT® books **may not** be used as reference material during the exam. The AAPC uses only the current calendar year codes on all exams. Second attempt exams occurring in the next calendar year will not be permitted to take the previous year's exam. AAPC strongly recommends using current year coding manuals.

References manuals for Specialty exams must be published (a Medical Dictionary is allowed as a reference book for Specialty Exams Only)

		Highly Recommended	In addition to Highly Recommended references, also permitted (optional)
Core: Professional	CPC®	None	None
Core: Out-Patient Facility	CPC-H®	None	None
